

**PlugGrip and SwitchGrip Now Available at All LOWE'S Home Improvement stores.**

Lindsay, California—August 28, 2006—PlugGrip Products is pleased to announce that both PlugGrip and SwitchGrip are now available at all LOWE'S Home Improvement stores nationwide.

The PlugGrip provides a quicker and safer way to wire and install outlets. It makes it easy to control stiff wires and works with any screwdriver. The PlugGrip reduces wiring time and as an added safety feature, it has built-in power warning lights. The SwitchGrip is used to install single pole and 3-way switches. It has a built-in 12g-14g wire stripper and 12g-14g wire bender, making the task even easier to complete.

“Our goal was to make working with wires less awkward and dangerous,” said PlugGrip inventor and general building contractor, Bryan Cahill. “Our products meet these goals and can be used by the professional completing dozens of outlet installations or, the homeowner working on weekend repairs or remodeling projects.”

The PlugGrip has received two very coveted awards. It has been the recipient of the Handyman Club of America Member Tested Seal-of-Approval. The Seal-of-Approval is recognized by hundreds of thousands of Handyman Club members. PlugGrip has also received the coveted Retailer's Choice Award from the Do-It-Yourself Retailing magazine. PlugGrip was chosen out of 150,000 products at the National Hardware Show.

The PlugGrip and SwitchGrip each sell for under \$10. The PlugGrip website has informative, instructional videos to show exactly how to use the products.

**About PlugGrip Products:**

PlugGrip Products has been in business since 1998. The inventors and owners of the company are a husband and wife team with many years of experience in real estate, construction, finance and sales.
